

***Photography Guidelines***

No flash pictures shall be taken in the sanctuary from the time the guests begin to arrive through the conclusion of the ceremony. During the wedding service, photography *without* flash may be taken from the narthex and balcony of the sanctuary. Flash may be used only as the couple leaves the church. To conserve time and prevent delay of the reception, it is strongly recommended that pictures be taken before the wedding begins. All videotaping must be done from the balcony only.
